

NEED INTERNET SERVICE?

WE CAN HELP.

Internet service providers are working hard to connect all Americans. This includes joining the Affordable Connectivity Program (ACP)—the successor to the Emergency Broadband Benefit (EBB) program approved in the bipartisan Infrastructure Act—to help people facing financial hardship pay for internet service and computers in their homes.

- **\$14.2 billion** committed by Congress and the White House to help low-income Americans pay for home broadband service.
- This help could include up to **\$30 a month** for internet service or up to \$75 a month on Tribal Lands and up to **\$100 to buy a computer** (laptop, desktop or tablet) if you contribute more than \$10 and less than \$50 toward the purchase price.

You are eligible to receive this benefit if **ANY of these apply:**

- ➔ Children in your home are eligible for free or reduced-price school lunch.
- ➔ Anyone in your home attends college with the help of a federal Pell Grant.
- ➔ Your household income is 200% or less than the Federal Poverty Guidelines.
- ➔ You qualify for certain assistance programs, such as SNAP, Medicaid, Federal Public Housing Assistance, SSI, WIC, or reduced-cost telephone service through the FCC's Lifeline Program.
- ➔ Participation in Tribal specific programs, such as Bureau of Indian Affairs General Assistance, Tribal TANF, or Food Distribution Program on Indian Reservations.

The Affordable Connectivity Program (ACP) is a program operated by the Federal Communications Commission that replaces the Emergency Broadband Benefit Program (EBB Program). The ACP benefit is non-transferable and limited to one discount per household.
